AEROWASH

AW3+

Robotic Dry & Wet Wash Solution for Aircraft

Upgraded AW3+ model offers more reach for comprehensive cleaning – now accessing the complete under side of the aircraft and the tail section with the new arm extension.

Technology at work for efficiency, safety and environment

Total concept to manage aircraft external washing requirements
- Technology & services & dry and wet wash fluid and cleaning concept

For organisations
- Planning, management and training
- Customer support & maintenance efficiency

For users
- Online training platform: www.aw-cs.com

The Aerowash holistic approach to aircraft exterior cleaning brings added value to its customers.

AW3+ is the leader in terms of efficiency, safety, easiness to learn and operate. With the total concept any customer can now have an efficient external cleaning operation.

> *Our vision is to be the market leader of aircraft washing systems and services. We provide technology and services that streamline and improve processes for our customers. It is with big satisfaction that we can see the impact that our robotic washing systems have had on our Customers' washing time.*
>
> Niklas Adler, CEO

Benefits

- Reduced man hours
- Reduced washing time
- Both dry and wet wash options available at all times
- Reduced risk of accidents
- High quality results with different brushes
- Online training platform for 24/365 support
- Good ergonomic conditions for operators

AW3+

AW3+ for more efficient and reliable aircraft washing.
Seamless human & machine interface: easy to learn, easy to operate, safe to use.

Quality washing

- Efficient and flexible brush movement
- Gentle on the aircraft
- Equipped with safety sensors
- Automatic distance adjustment
- Automatic angle adjustment

Efficient operation

- Different washing programs
- Automatic start position
- Automatic folding and unfolding
- Four-wheel drive
- Battery powered

User friendly

- Intuitive remote control
- Display for operation and monitoring
- Safety features
- Ergonomic design
- Wireless

Training

We are experts in aircraft external cleaning working practices. We can evaluate existing processes and enhance them into more efficient ones.

Online operator support

Aerowash online training platform provides 24/365 support for all users. Interface can be customised to any language. Training videos and instructions provide easy and understandable support for hassle free operations. Visit aw-cs.com.

Service and support

The Aerowash Service Team is available to provide support as agreed. Our experience from supporting operations around the world gives us the knowhow and tools to assist our customers efficiently and effectively.

AW|DRY

100% Biodegradable Dry Wash Concept

We have a partnership with SOCOMORE, a specialist in aeronautical chemistry which has developed a 100% biodegradable exterior aircraft cleaner solution.

Compared to high pressure cleaners that require hot water rinsing with a high pressure washer, SOCOCLEAN EXTERIOR AIRCRAFT CLEANER used with AW3+ offers a dry wash solution with real benefits:
99% water saved during aircraft cleaning;
does not require waste water reprocessing according to the site regulations.

AW|DRY fluid can be shipped, stored, and used without any special considerations. It does not require operators to wear any special protective equipment. It also has a confirmation report of 0% toxicity of dermal, ocular, or ingestion.

Aerowash AW3+ and SOCOCLEAN offers a unique dry wash concept for environmentally friendly and efficient aircraft exterior cleaning.

Key Features

- Concentrated solution for dilution
- Refill format in 5, 210 & 1000 L
- Effective on a large variety of pollutants
- No rinsing – leaves no residue
- Approved by Airbus and Boeing
- AMS 1526 C, Boeing BSS 7432, Airbus AIMS 09-00-002

Key Benefits

- Quick and simple to use
- 100% plant-based
- Ultimate biodegradability of 100 % of the formula
- Zero hazard identification in terms of toxicity and ecotoxicity
- Safe for health – no Personal Protective Equipment needed
- Cleans and leaves a polished finish in one application
- Can be used in wet & hot conditions
- Can be used with express machines or manually
